

EASY TO USE GUIDE FOR CLEANING ROMAINE HEARTS

**RCC Kosher is pleased to provide these cleaning guidelines for
NON-ORGANIC ROMAINE HEARTS
to help ensure an EASY yet KOSHER PESACH.**

Prior to washing, look for obvious signs of infestation, if you see many bugs, do not use that head. If the lettuce looks clean please use the washing method below.

- 1. Fill large bowl or sink with water.**
- 2. After the sink or bowl is full, add sufficient soap or veggie wash until the water has an oily feel.**
- 3. Soak leaves in soapy solution for 2 minutes.**
- 4. Agitate lettuce leaves in soapy solution.**
- 5. Using a vegetable brush, brush EACH leaf on BOTH sides with the soapy solution.**
- 6. Rinse EACH leaf carefully under a direct stream of water to ensure that all areas are washed well and the water hits the surface area of the entire leaf.**

No further checking is required

PLEASE NOTE: The above procedures are based upon current conditions in the Los Angeles area for Pesach 5778-2018 and are ONLY for use with NON-ORGANIC Romaine HEARTS. Full Romaine heads and/or Organic hearts require a careful inspection of each leaf PRIOR to their use EVEN after soaking in a soapy solution and rinsing.
